## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claims 1-31, drawn to a product comprising a dietary supplement and food product, are for example classified in class 426, subclass 656.

Group II, claims 32-45, drawn to a process of making a dietary supplement and/or a food product, are for example classified in class 426, subclass 531.

The inventions are distinct, each from the other for the following reasons:

Inventions of group II and group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a process in which the components can be admixed in a different order of steps or by hand.

Because these inventions are distinct for the reasons given above and since they have acquired a separate status in the art as shown by their different classification and/or divergent subject matter, and/or are separately and independently searched, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/904,713

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
